SPECIAL FERTILIZERS

PRODUCTS	PERCENTAGE COMPOSITION GUARANTEED CONTENT (W/W%)										DESCRIPTIONS	AMOUNTS TO BE USED		PACKAGE	
	N	P ₂ O ₅	K ₂ O	MgO	Fe	Zn	Mn	B	Mo	FOLIAR APPLICATION g or ml /100 L water		SOIL APPLICATION kg or L /1000 m ²	L	kg	
2000 Agri NOABSES	18	5				1					It is a liquid mixture containing nitrogen, potassium, zinc and special substances. It prevents flowers, fruits and leaves from falling off. It quickly relieves symptoms that may occur due to any physiological stress. It accelerates fruit development. It increases the number of pollinations by directly affecting pollination. It rejuvenates the plant. It accelerates root regeneration and function. It accelerates fruit development. It increases the auxin level in plants.	150-200	1-2	1-5-20	
2000 Agri GENESIS	10	10	6								It is a liquid mixture consisting of nitrogen, phosphorus, potassium and special substances. It accelerates special substances. It increases pollen formation and function. It accelerates the development of fruits after or without fertilization. It facilitates the longitudinal growth of fruits. It prevents fruit shedding due to malfunctions in fertilization. It regulates the secretion of youth hormones in plants.	150-200	1-2	1-5-20	
2000 Agri NIMBUS	25	10	15		0,2	1	0,1				It is a powder mixture containing low biuret, phosphorus, potassium, trace elements and special substances. It meets the nitrogen and trace element needs of plants. It relieves stress in plants with high nitrogen requirement. It facilitates and regulates vegetative growth. It accelerates fruit development. It prevents blossom and fruit shedding. It meets the energy needs of the plant. It accelerates root development.	150	1-3		1-2,5-10
2000 Agri RATOON	14	18	24			1		0,2			It is a powder mixture consisting of nitrogen, phosphorus, potassium, trace elements and special substances. It directly increases root development and function. Shortens the self-renewal time of the roots. It thickens the plant body. It slows down the longitudinal growth. It increases the number of blossoming.		1-3		1-2,5-10
MAXIFORTE	14	7	21	2	0,2	0,2	0,5				It is a powder mixture containing nitrogen, phosphorus, potassium, magnesium, trace elements and special substances. It makes the fruits larger, plumper and brighter. It regulates the secretion of color pigments (early maturation). It allows multiple blossom to bloom and pollinate at the same time. It meets the general nutritional needs of the plant. Prevents plant fatigue. Supports root development and function.	200-250	1-3		1-2,5-10
TRANS-POL	5	30	13			0,5		3	2,5		It is a powder mixture containing nitrogen, phosphorus, potassium, trace elements and special substances. It provides increased formation and function of blossoming and pollens. It provides direct pollination. It promotes the number of Blossoms by encouraging lateral growth. It provides increased root development and function.	100-150	1-2		0,5-1-10
2000Agri YANDAL		24	40	2		0,5	0,15	0,1	0,02		NPK powder blend enriched with active substances, limiting excessive elongation and shortening internodes, regulating hormonal and enzymatic systems, promoting balance between flowering, fruiting, and vegetative growth, and improving flower quality, pollen quality, and fruit development.	100-200	1-2		1-2,5-10
2000Agri DURAN		9	9			0,4					It is a special mixture enriched with phosphorus, potassium special substances. It is an acidic product. It ensures the regular growth of plant internodes and prevents their excessive elongation. It regulates the plant's hormone and enzyme secretion by stimulating the roots. It ensures the regular growth of the plant and blossom-pollen formation by directly increasing root development and function.		2-3	5-20	
Agrodore ALCARAZ	13	9	30	2	0,2	0,2	0,2				It is a powder mixture containing nitrogen, phosphorus, potassium, magnesium, trace elements and special substances. It makes the fruits larger, plumper and brighter. It regulates the secretion of color pigments (early maturation). It allows multiple blossom to bloom and pollinate at the same time. It meets the general nutritional needs of the plant. Prevents plant fatigue. Supports root development and function.	100	1		1-2,5-10
Agrodore FLORESA	7	24	29			0,6		1,5	1,25		It is a powder mixture containing nitrogen, phosphorus, potassium, trace elements and special substances. It provides increased formation and function of blossoming and pollens. It provides direct pollination. It promotes the number of Blossoms by encouraging lateral growth. It provides increased root development and function.	100	1		0,5-1-10

MICRO ELEMENT FERTILIZERS

PRODUCTS	PERCENTAGE COMPOSITION GUARANTEED CONTENT (W/W%)										DESCRIPTIONS	AMOUNTS TO BE USED		PACKAGE	
	N	P ₂ O ₅	K ₂ O	MgO	Fe	Zn	Mn	B	Cu	Mo		FOLIAR APPLICATION g or ml /100 L water	SOIL APPLICATION kg or L /1000 m ²	L	kg
PROMAX COMBI					6	5	3	1,5	0,5	0,1	It is a powder fertilizer containing enzymes and high levels of trace elements. It is absorbed and transported by the plant at very high speed from the roots and leaves. It is quite effective and sufficient even at low doses."	100-150	0,25-1		1-5-10
2000Agri FULMAKS	15		5	6	2	4	4	0,2			FULMAKS is a powder fertilizer with high nitrogen content, enriched with magnesium and micronutrients. It is a special mixture prepared to eliminate nitrogen deficiency during the vegetative growth period and fruit growth period of the plant. It is a special product that accelerates fruit development. It causes the plant to turn dark green. Promotes photosynthesis and chlorophyll. It accelerates plant formation. It ensures the health of the plant.	150	0,25-1		1-5-10
Agrodore MIXLE					2,5	10	8	2			It is a powder fertilizer containing enzymes and high levels of trace elements. It is absorbed and transported by the plant at very high speed from the roots and leaves. It is quite effective and sufficient even at low doses."	100-150	0,25-1		1-5-10
Agrodore BORZINO						6		3			It is a liquid fertilizer containing zinc and boron. It is a product prepared to eliminate the negative effects caused by the deficiency of boron and zinc. It has the feature of increasing pollen formation and fertilization.	100-150	1-2	1-5-20	
2000Agri BOLBOR								8			It is a liquid fertilizer containing boron, organic substances and free amino acids. Due to the combination of boron with amino acids, its phytotoxicity effect is minimized. It is a product that meets the boron deficiency or need in the plant. It prevents the fruit from cracking and stains on the fruit. It encourages pollen formation. It prevents regression in the growth points (meristem tissue) of the plant.	100-150	0,5-1	1-5-20	
2000Agri BOLMANG							10				It is a liquid fertilizer containing manganese. It prevents color fading in fruits, supports chlorophyll formation, increases fruit set, and enhances photosynthetic activity.	100-150	1-2	1-5-20	
GLUKOMIX Mn-Fe					2,5		3,5				It is a liquid mixture in which Manganese and Iron, which are antagonists of each other, are brought together with special substances. It can be completely absorbed and transported even in high pH, calcareous soils. Symptoms of yellowing (chlorosis) and necrosis that may occur in manganese-iron deficiency disappear immediately. It regulates and corrects any discoloration that may occur in the fruit.	100-150	1-2	1-5-20	
PROLIUM CuMnZn						1	1		5		It is a special liquide mixture that meets the need for Zinc and Manganese in the plant when Copper is given and carries them to the plant quickly with special substances. It protects the plant against bacterial and fungal diseases and prevents the disease if it is infected. It has contact and systemic effects.	150-200	1-2	1-5-20	
SPECIAL PROFER 6					6						It is a 6% EDDHA chelated iron powder fertilizer. It accelerates protein formation in plants. With its EDDHA chelate, it covers the positively charged cations needed by the plant with a negatively charged molecule. It is easy to use thanks to its wide pH range. It promotes high yield and fruit formation in plants. It ensures oxygen transport in chlorophyll production. It darkens the color of the leaf, allowing it to absorb more solar energy. Increases leaf thickness and nutrient absorption"		0,25-1		1-5
SupKor Cu						3					It is a liquid fertilizer mixed with copper and special substances. It has a general disinfectant effect (against all diseases). It is especially effective in bacterial and fungal diseases that are difficult to solve. It prevents virus contamination and spread. It enables the communication bundles of the plant to be opened. It is systemic and contact effective.	100-200	1-2	1-5-20	

ORGANOMINERAL FERTILIZERS

PRODUCTS	PERCENTAGE COMPOSITION GUARANTEED CONTENT (W/W%)										DESCRIPTIONS	AMOUNTS TO BE USED		PACKAGE	
	ORG. MAT	N	P ₂ O ₅	K ₂ O	MgO	Fe	Zn	Mn	B	Cu		FOLIAIR APPLICATION g or ml / 100 L water	SOIL APPLICATION kg or L / 1000 m ²	L	kg
2000Agri APEX-NK	25	10		8							It is a liquid mixture containing organic substances, nitrogen, potassium and special substances. It regulates the soil structure and allows the plant to absorb water and nutrients more easily. It ensures direct root development and supports the function of the root. It accelerates fruit development and growth. It increases the brightness and attractiveness of the fruit. It increases the quality by controlling the formation and secretion of color pigments in the fruit. It ensures rapid uptake of the Nitrogen needed by the plant.	100-150	2-3	20	
MICRONEX COMBI	35	7		5		0,4	0,3	0,3	0,2		It is a liquid mixture consisting of organic substances, nitrogen, potassium, trace elements and special substances. It regulates the soil structure and allows the plant to absorb water and nutrients more easily. It provides direct root development and supports the function of the root. It accelerates fruit growth. It increases the quality by controlling the formation and secretion of color pigments in the fruit. It increases the brightness and attractiveness of the fruit. It provides the necessary trace elements to the plant.	100-150	2-3	20	
2000Agri MEGA-N	10	15			2	0,2		0,3			It is a liquid mixture containing organic substances, nitrogen, magnesium, trace elements and special substances. It meets the organic matter need of the plant by regulating the organic structure of plants and soil. Promotes the growth of fruits and plants. It helps to increase quality by controlling the formation and secretion of color pigments in the fruit. It supports healthy root formation.	100-150	2-3	20	
2000Agri PRO-F	10	3	15				2		0,5		It is a liquid mixture containing organic substances, nitrogen, phosphorus, trace elements and special substances. It is the ideal nutrient source for the plant due to the high amount of plant nutrients and organic substances it contains. It promotes blossom in plants and supports the elongation of blossomstems. It encourages an increase in the number of blossom and fruits and the amount of pollen, and helps ensure the rapid development of growth points in plants.	100-150	2-3	20	
2000Agri DEN-GOO	10	7	7	7							It is a liquid balanced mixture containing organic substances, nitrogen, phosphorus, potassium and special substances. It regulates the general development of the plant. It facilitates blossom, fruit and vegetative growth. It increases root development and meets the need for organic matter.	100-150	2-3	20	
Agrodore ORENDA	15	9		5	2						It is a liquid mixture containing organic substances, nitrogen, potassium, magnesium and special substances. It regulates the soil structure and allows the plant to absorb water and nutrients more easily. It ensures direct root development and supports the function of the root. It accelerates fruit development and growth. It increases the brightness and attractiveness of the fruit. It increases the quality by controlling the formation and secretion of color pigments in the fruit. It ensures rapid uptake of the Nitrogen needed by the plant.	100-150	2-3	20	
MAXIEND 10-7-17	10	10	7	17	2		1	1			Maxiend 10-7-17 is a rich gel fertilizer consisting of organic substances, NPK, Magnesium, trace elements and special substances. It accelerates fruit development. It increases fruit weight. It accelerates ripening. It provides energy to the plant. It meets the need for root development and organic matter. It ensures rapid coloring of the fruit.				15
TORK-K15	25	6		15			1	0,5		0,5	It is a gel fertilizer containing organic substances, nitrogen, potassium, magnesium, trace elements and special substances. It ensures rapid growth of fruits and plants by meeting the organic matter needs of plants and soil. It helps the fruits to become brighter and more colorful by increasing their weight. It accelerates root development (by regulating the soil structure and directly increasing root functions).		2-5		15
2000Agri POTANIA-NK	27	6		20	2	1	0,5				It is a gel fertilizer containing organic substances, nitrogen, potassium, magnesium, trace elements and special substances. It provides rapid growth and ripening of fruits by meeting the organic matter need of the plant. It eliminates color problems in fruits and adds color. It regulates root functions.	200-300	2-5		15

ORGANIC FERTILIZERS

PRODUCTS	PERCENTAGE COMPOSITION GUARANTEED CONTENT (W/W%)						DESCRIPTIONS	AMOUNTS TO BE USED		PACKAGE	
	ORG. MAT	FREE AMI ACID	ORG. CAR.	ORG. N	K2O	ALGINIC ACID		FOLIAIR APPLICATION g or ml / 100 L water	SOIL APPLICATION kg or L / 1000 m ²	L	kg
2000Agri FULL ENERGY 7	50	7	20	3			Organic matter is a liquid mixture consisting of organic carbon and amino acids. It regulates and accelerates the conversion of inorganic Nitrogen (Urea, Nitrate, ammonium) to organic Nitrogen in the plant. It regulates hormone functions by entering the structures of plant hormones. It increases the resistance of plants to stress. It regulates protein synthesis in the plant. It regulates the synthesis of color pigments. It regulates and accelerates the color of plants and fruits by entering into their structure. It provides the necessary energy for all life functions of plants.	100-200	1-3	1,5-20	
2000Agri FULVONET	45		18	3	7		It is a product rich in organic matter, organic carbon and Humic & Fulvic acids that increases the water retention capacity of the soil, regulates the soil structure and ensures easy rooting of plants, and can be easily taken and carried by the plant. It prepares the necessary soil environment for rooting. It especially regulates nitrogen uptake and transport.	100-200	1-3	1,5-20	
2000Agri RUTIN	15	2	7	1	0,5		It regulates many vital activities in plants thanks to the organic matter, organic carbon and amino acids it contains. It improves the organic structure of the soil and the plant. It increases the activities of microorganisms in the soil. It highly increases capillary root development. Thanks to plant growth regulators, it directly enables root development and supports the function of the root.		1-3	1,5-20	
2000Agri ALGAMAX	13				4	1	It is a liquid organic fertilizer containing high levels of seaweed. It provides fruit quality, yield, root development and early plant development. It helps plants grow healthy, balanced and develop roots with the nutrients it provides. It increases fruit set and growth. When applied, it provides positive results in protecting the products grown against environmental adverse conditions and in improving them. It provides an increase in yield and quality by providing healthy root and plant development.	100-200	1-3	1,5-20	

OTHER PRODUCTS

PRODUCTS	DESCRIPTIONS	AMOUNTS TO BE USED		PACKAGE	
		FOLIAIR APPLICATION g or ml / 100 L water	SOIL APPLICATION kg or L / 1000 m ²	L	kg
2000 OCTIL	This is a product obtained from organic acid carried by a polar solvent, which by enhancing the nutrient uptake of the plant owing to its ability to reduce the surface tension of leaves, makes the product an excellent healer. It prevents the chitin synthesis of insects. It prevents insect growth. It can be fed by being mixed with chemicals. It has a sticker-spreader effect. It enhances the chemical efficacy by adjusting pH.	50-75		0,5-1-5	
2000 CO-MUT	This product is a pH reducer, homogeneous mixture provides penetration enhancer and spreader and adhesive. It regulated the uptake of chemicals by the plants. It regulates the mixture of chemicals and fertilizers	100		0,5-1-5	

SOLUBLE POWDER FOLIAR FERTILIZERS

They are specially blended, acidic powder leaf fertilizers that are absorbed very quickly by the plant. They are available in a wide variety of formulations.

They can be used in every period and on every plant. They are effective even when used in low doses.

MICROBIAL BACTERIA

PRODUITS	Types of bacteria	Which insects and fungal diseases does it help control?	DESCRIPTIONS
2000Agri GREEN	Bacillus megaterium RC07, Pantoea agglomerans RC58, Pseudomonas fluorescens RC77	Fusarium wilt, Rhizoctonia, Phytophthora, Root rot, Beet rhizomania, Septoria disease of cereals	Accelerates the development of roots and capillary roots. Increases nutrient uptake and reduces stress. Strengthens the plant's immune system. Improves nitrogen utilization and phosphate solubility. When applied with 2000Agri Vita, it is also effective against Mosaic Virus, Potato Y Virus, Rugose Virus, Yellow Curly Lettuce Virus, and Brown Virus.
2000Agri VITA	Bacillus megaterium RC3D, Bacillus subtilis RC521, Pseudomonas fluorescens RC512	Powdery mildew, Gray mold (Botrytis), Bacterial blight, Root rot of cereals, Septoria	Promotes increased tillering, enhances flowering and yield. Balances vegetative and generative growth. Supports the plant's defense system. Improves nitrogen fixation and phosphate solubility.
2000Agri STEELMAX	Bacillus megaterium Ar342/4, Bacillus subtilis Paz39/3, Pseudomonas fluorescens Tea 53/6, Lyobacter enzymogenes Ar9/8	Downy mildew, Fusarium wilt, Powdery mildew, Gray mold (Botrytis), Bacterial blight	Solubilizes potassium, calcium, and iron present in the soil. Produces powerful enzymes. Improves fruit taste, coloration, and oil content/quality. Contributes to proper internal fruit filling. Eliminates chemical residues on the plant. For nematode control, use in combination with 2000Agri Green is recommended.
2000Agri RANGER	Bacillus megaterium RC491, Bacillus subtilis RC11S1, Pseudomonas stutzeri RC281, Bacillus thuringiensis RC591	Nematodes, Tuta absoluta (tomato leafminer), Cockchafer (white grub / cockchafer larva)	Used for plant nutrition and biological pest control. Solubilizes potassium and iron. Improves fruit coloration and flavor. Contains Bacillus thuringiensis (BT). Rapidly reduces pesticide residues and heavy metals by up to 33%.

Our microbial products regulate the pH balance of the soil and plant sap, thereby limiting the development of insects and fungal diseases.

They make insect egg-laying more difficult, suppress pathogenic hotspots, and enhance the plant's tolerance to stress.

They fix nitrogen, solubilize phosphorus, potassium, and micronutrients, and convert organic matter into humic and fulvic acids, then into amino acids that can be readily absorbed by the plant.

PHOSPHITE SERIES
